

ISOLOGIC

Innovative Radiopharmaceuticals

December 20th, 2018

Dear Customer,

We would like to inform you that due to an unforeseeable I-131 Dx capsule production issue we will not be able to produce and ship I-131 Dx capsule for an undetermined period of time.

We have a limited quantity of capsules available for the week of December 24th. The activities are 35.54 μ Ci and 10.66 μ Ci with an expiry date of 04-JAN-2019.

We have ordered I-131 DX capsules from an alternate vendor; however, these capsules are 100 μ C calibrated for January 2nd, 2019. Please find below the range of activity for use:

Monday January 7th – 65 μ Ci

Monday January 14 – 30 μ Ci

Monday January 21st - 16.5 μ Ci

Monday January 28th – 10 μ Ci

Monday February 4th – 5 μ Ci

We apologize for this interruption and we realize this will affect your ability to serve your patients adequately, be assure we are working diligently on fixing the problem. We will keep you up to date as to when we can resume production.

Do not hesitate to contact your local Radiopharmacy should you have any questions.

Cordially,

Annette Proulx
VP Operations
